INDEX OF SUBJECTS VOLUME 21

A

Acrylamide, fibronectin network recovery in confluent PtK2 cells after treatment with 647
ACTH, -induced steroidogenesis 479, 687
Actin, -localization at the tight junctions of invertebrate ciliated epithelia 37
—, of endothelial cells 161
—, of Sertoli cells 361
—, of shark leucocytes during chemotactic migration 47
Adhesion, and fusion of the extra-embryonic epiblast 735
—, molecule, J1/tenascin 639
Adipose tissue, subepidermal, and the ovary of the shrimp *Penaeus semisculcatus*, protein synthesis *in vitro* in cultures of 911
Adrenergic drugs, stimulation of tracheal gland mucous cells by 59
Alkalosis, metabolic, histological changes in the skin of *Rana pipiens* produced by 219
Amphibian, adult newt *Notophthalmus viridescens*, localization of insulin, glucagon and somatostatin in the pancreas of 1
—, frog *Rana pipiens*, histological changes in the skin of, produced by metabolic alkalosis 219
—, natterjack toad *Bufo calamita*, macrophages and epithelial cells of the thymus gland of 69
—, newt, cardiac myocytes of 335
—s, *Xenopus laevis* and *Rana temporaria*, a comparison of the distribution of muscle type in the tadpole tails of 773
Annulate lamellae, an organelle in search of a function 343
Anoxia, effects of, an cellular damage in the incubated mouse diaphragm 857
Anterior pituitary, of the rat, granulated marginal cell layer of 849
Antibodies, to the mammalian adhesion molecule J1/tenascin and its carbohydrate epitope L2/HNK-1 label the receptor lymph cavities of insect sensilla 639
Arachnid, ixodid tick, wax lipid secretion in Gené's organ of 113
—, pseudoscorpion, spermiogenesis in 153
Artery, pulmonary, bovine, endothelial cells of 171

B

Barnacle, *Tetraclita squamosa japonica*, ultrastructural investigations on the muscular systems in 863
Basal cells, development of ciliated and mucus cells from, in hamster tracheal epithelial cell cultures 195
—, lamina, hemocytes contribute to both the formation and breakdown of, in developing wings of *Manduca sexta* 559
— —, in insect oenocytes 463
Bone, -resorbing cells in elasmobranchs; comparison with osteoclasts 925
Bradykinin 171
Bromocryptine, ultastructure of pituitary folliculo-stellate cells of lactating rat, during treatment with 841

C

Calcium, cytochemical localization of in renal sac nephrocytes of *Helix aspersa* 753
—, salts, deposition of, in oocytes and ovarian somatic tissue of millipedes 443
— concentration, free ctyoplasmic, dual-phase response of bovine pulmonary artery endothelial cells to agonists which increase 171
— deposition, before the embryonic moult, in the amphipod crustacean *Orchestia cavimana* 431
— -induced differentiation, of *Physarum polycephalum* 495
cAMP, level, exogenous glycosaminoglycans modulate, in limb bud mesenchyme 673
Cell culture, growth and differentiation of opossum kidney cells on microscopically transparent microporus membranes 355
— —, of adult newt cardiac myocytes 335
— —, of hamster tracheal cells 195
— growth, exogenous glycosaminoglycans modulate, in limb bud mesenchyme 673
— lineage, the same is involved in scale formation and regeneration in the teleost fish *Hemichromis bimaculatus* 447
— migration, chemotactic, of shark leucocytes 47
— —, from the sponge *Geodia cydonium* 25
— retraction, induced interphase, its reversal and EGF potentiation 321
— surface, of insect oenocytes 463
Centrifugation, elimination of the nucleolus from the nucleus of a living cell by, a literature review 535
Chemoreceptors, in cercal sensilla of blowfly 281
Chemotaxis, in cells of the sponge *Geodia cydonium* 25
—, of shark leucoytes 47
Chitin, localization of, in peritrophic membrane 627
Chloride, localization of, and the change in calcium deposition before the embryonic moult in the amphipod *Orchestia cavimana* 431
Cholesteric liquid crystal, of silkmoth chorion 227
Cholinergic drugs, stimulation of tracheal gland mucous cells by 59

Chondrogenesis, exogenous glycosaminoglycans modulate, in limb bud mesenchyme 673
Chorion, silkmoth, morphogenesis of, sequential modification of an early helicoidal framework through expansion and densification 227
Ciliate, karyorelictean, *Trachelorophis*, ultrastructure of feeding in, examined by SEM 189
—d cells, and mucus cells, development of from basal cells in hamster tracheal cell cultures 195
— epithelia, invertebrate, actin localization at tight junctions in 37
Cnidocysts, of narcomedusae and a medusivorous ctenophore 723
Cnidocytes, and adjacent supporting cells form receptor-effector complexes in anemone tentacles 17
Coelenterate, cnidocytes and adjacent supporting cells form receptor-effector complexes in anemone tentacles 17
—, *Hydra*, a single layer of microtubules is part of a complex cytoskeleton in mature nematocytes of 179
—, *Hydra carnea*, oogenesis in 361
—s, narcomedusae and a medusivorous ctenophore, novel cnidocysts of, and confirmation of kleptocnidism 723
Collagen, in teleost scale differentiation 447
Confocal microscopy, of endothelial cell microfilaments 813
Connectin, anti-, bind dense bodies of muscle cells of the nematode *Caenorhabditis* 517
Coupling, dye and electrical, of endothelial cells, *in situ* 797
Crustacean, amphipod *Orchestia cavimana*, ultrastructure of the embryonic dorsal organ of, with a note on localization of chloride and on the change in calcium-deposition before the embryonic moult 431
—, barnacle, muscular systems in 863
—, green crab *Carcinus maenas*, ultrastructural changes in the gill epithelium of, in relation to the external salinity 299
Ctenophore, medusivorous, novel cnidocysts of narcomedusae and a medusivorous ctenophore, and confirmation of kleptocnidism 723
Culture media, conditioned by wounded cells modify the fibronectin localization pattern of unwounded confluent PtK2 cells 653
Cuticle, intra-, or tardigrade, dehydration-dependent permeability barrier in 263
—, of a pentastomid arthropod parasite, developing in its rodent intermediate host 699
—, of *Peripatus* 605
Cytoskeleton, actin localization at the tight junctions of invertebrate ciliated epithelia 37
—, during pseudoscorpion spermiogenesis 153
—, fibronectin localization patterns of unwounded confluent PtK2 cells modified by culture media conditioned by wounded cells 653
—, fibronectin network recovery in confluent PtK2 cells after treatment with acrylamide 647
—, immunoelectron microscopic localization of a fibronectin-like molecule in *Dugesia lugubris* 507
—, involvement in spermiation and sperm transport 361
—, microtubular, in germ tissue of an insect 123
—, microtubules, organelle transport, and steroidogenesis in cultured adrenocortical tumor cells 479, 687
—, of *Hydra*, a single layer of microtubules is part of a complex 179
—, of diaphragm muscle 211
—, of shark leucocytes during chemotactic migration 47
—, microfilaments of endothelial cells, effects of phorbol esters on 831

D

D-amino acid, -oxidizing enzyme, ctyochemical localization of, in *Drosophila melanogaster* 661
Dendrites, of pheromone-sensitive antennal sensilla 139
—, sensory, structure of the enveloping cells and the basal regions of, in cercal sensilla of the blowfly 281
Dense bodies, of muscle cells of *Caenorhabditis* (Nematoda), anti-connectin monoclonal antibodies that react with the unc-22 gene product bind 517
Dermal gland, Gené's organ, of ixodid ticks 113
Desert adaptation 83
Differentiating cells, annulate lamellae in 343
Differentiation, adhesion and fusion of the extra-embryonic epiblast 735
—, avian epidermal, II. Adaptive response of permeability barrier to water deprivation and replenishment 83
—, calcium induced, of white mutant (LU887 × LU897) strain of *Physarum polycephalum* 495
—, influence of, on muscarinic receptors in NIE 115 neuroblastoma cells 825
—, of ciliated and mucus cells, in hamster tracheal epithelial cell cultures 195
—, of nurse cells in *Hydra carnea* 381
—, of sperm 361
—, of teleost scales 447
Digestive system, of mosquito larvae 243, 253
DNA synthesis, in cell cultures of the adult newt cardiac myocyte 335
Dorsal organ, of amphipod crustacean *Orchestia cavimana*, ultrastructure of, with a note on localization of chloride and on the change in calcium-deposition before the embryonic moult 431
Dugesia lugubris, immunoelectron microscopic localization of a fibronectin-like molecule in 507
Dye, and electrical coupling of endothelial cells, *in situ* 797

E

EGF potentiation, induced interphase cell retraction: its reversal and 321
Egg, -waxing (Gené's) organ in ixodid ticks, ultrastructural development of 113
Elasmobranch, shark, fine structure of leucocytes of, during chemotactic migration 47

—s, demonstration of bone resorbing cells in: comparison with osteoclasts 925
Electrical, and dye coupling of endothelial cells, *in situ* 797
Enameloid organ, of developing teleost fish teeth, the penetration of exogenous tracers through the 419
Endocrine pancreas, of adult newt, localization of insulin, glucagon and somatostatin in 1
Endothelial cell, junctional integrity modulation by serotonin: an ultrastructural analysis 161
— —s, bovine pulmonary, dual-phase response of, to agonists which increase free cytoplasmic calcium concentration 171
— —, dye and electrical coupling of, *in situ* 797
— —, microfilaments of, effects of phorbol esters on 813
Endothelium, structural alterations in vascular tight junctions of, in the course of their gradual degradation *in vitro* 803
Enzyme secretion, digestive, the intracellular pathway and kinetics of, in an insect midgut cell 101
Epiblast, extraembryonic, adhesion and fusion of the 735
Epidermal differentation, avian. II. Adaptive response of permeability barrier to water deprivation and replenishment 83
— feet, development of, in preparation for metamorphosis in an insect 891
Epidermis, in monhysterids (Nematoda), a putative new hydrostatic skeletal function for 525
Epithelia, ciliated, actin localization at the tight junctions of invertebrate 37
Epithelial cells, and macrophages, of the thymus gland 69
Epithelium, gill, of green crab *Carcinus maenas*, ultrastructural changes in, relation to external salinity 299
—, midgut, of *Aeshna cyanea* larvae, peroxisomes of 917
—, tracheal, of golden hamster, development of ciliated cells and mucus cells from basal cells in 195
Epitope, L2/HNK-1 639
Estrus cycle, of the rat, pituitary intracisternal granule formation during 11

F

Fat body, an autoradiographic analysis of vitellogenin synthesis and secretion of, in the stick insect *Bacillus rossius* 543
— —, of *Aeshna cyanea* larvae, peroxisomes of 917
— —, the secretory pathway of vitellogenin in, of the stick insect *Bacillus rossius*: an ultrastructural and immunocytochemical study 589
Fibronectin, -like molecule in *Dugesia lugubris*, immunoelectron microscopic localization of 507
—, localization patterns of unwounded confluent PtK2 cells, culture media conditioned by wounded cells modify 653
—, -network recovery in confluent PtK2 cells after acrylamide treatment 647
Fish, elasmobranchs, demonstration of bone resorbing cells in: comparison with osteoclasts 925
—, scales, ultrastructural and histochemical aspects of zinc accumulation by 935
FMRF, -amid immunoreactivity in moth cerebral nevous system 569
Folliculo-stellate cells, of lactating rat during treatment with 2-bromo-α-ergocryptine, ultrastructure of 841
Foot processes, epidermal, in an insect 891
— —, of triads of two types of muscle fiber from hind limb muscles of the rat, quantitation of 783
Freeze-fracture, of adult honeybee dorsal ocelli 199

G

Gap junctions, immunolocation of in *Drosophila* 835
— —, in honeybee dorsal ocelli 199
Ganglion, mesothoracic, of *Locusta migratoria*, localization of glutamate decarboxylase in 581
Gené's organ, or ixodid ticks, wax lipid secretion in 113
Geodia cydonium, sponge, directed migration of cells from 25
Germ cells, annulate lamellae in 343
Gill epithelium, of the green crab *Carcinus maenas*, ultrastructural changes in, in relation to the external salinity 299
Glial cells, adult insect, cultured: activation, substrate effects and proliferation 759
Glucagon, insulin and somatostatin, localization of in the pancreas of the adult newt, *Notophthalmus viridescens* 1
Glutamate decarboxylase, localization in the mesothoracic ganglion of *Locusta migratoria* 581
Glycosaminoglycans, exogenous, modulate chondrogenesis, cyclic AMP level and cell growth in limb bud mesenchyme cultures 675
Gonadotrophs, in estrus cycle of the rat 11

H

Helicoidal framework, of silkmoth chorion 227
Hemocytes, contribute to both the formation and breakdown of the basal lamina in developing wings of *Manduca sexta* 559
Hydra, a single layer of microtubules is part of a complex cytoskeleton in mature nematocysts of 179
—, *carnea*, oogenesis in: a new model based on light and electron microscopic analyses of oocyte and nurse cell differentiation 381

I

Immunochemistry, localization of glutamate decarboxylase in mesothoracic ganglion of *Locusta migratoria* 581
—, of FMRF-amide in moth cerebral nervous system 569
Immunocytochemistry, antibodies to the mammalian adhesion molecule J1/tenascin and its carbohydrate epitope L2/HNK-1 label the receptor lymph cavities of insect sensilla 639

—, EM immunolocation of gap junctions in *Drosophila* 835
—, of vitellogenin, in fat body of an insect 589
Insect, adult, glial culture: activation, substrate effects and proliferation 759
—, *Aeshna cyanea* larvae, peroxisomes of the midgut epithelium, Malpighian tubules and fat body of 917
—, blowfly *Lucilia cuprina*, cercal sensilla of. II. Structure of the enveloping cells and the basal regions of the sensory dendrites 281
—, *Drosophila*, cytochemical localization of a D-amino acid oxidizing enzyme in peroxisomes of 661
—, *Drosophila*, immunolocation of gap junctions in 835
—, dynamic role of microvilli in peritrophic membrane formation 627
—, firebrat *Thermobia domestica* (Thysanura): spiracular closing mechanism in 93
—, hawkmoth *Manduca sexta*, fine structure of the pheromone-sensitive sensilla on the antenna of 139
—, honeybee, intercellular junctions and rhombic particle arrays in the developing and adult dorsal ocelli of 199
—, *Locusta migratoria*, immunocytochemical localization of glutamate decarboxylase in the mesothoracic ganglion of 581
—, *Manduca sexta*, hemocytes contribute to both the formation and breakdown of the basal lamina in developing wings of 559
—, midgut cell, the intracellular pathway and kinetics of digestive enzyme secretion in 101
—, mosquito larvae, investigations on the midgut caecae of 243, 253
—, moth larva *Heliothis zea*, FMRF-amide immunoreactivity in the cerebral nervous system of 569
—, *Pieris brassicae*, mode of formation of the flight muscle in 875
—, silkworm, morphogenesis of chorion of, sequential modification of an early helicoidal framework through expansion and densification 227
—, stick insect *Bacillus rossius*, an autoradiographic analysis of vitellogenin synthesis and secretion in the fat body of 543
—, the development of epidermal feet in preparation for metamorphosis in an 891
—, the development of microtubular arrays in the germ tissue of telotrophic ovary of 123
Insulin, glucagon and somatostatin, localization of in the pancreas of the adult newt, *Notophthalmus viridescens* 1
Integument, of *Peripatus*, ultrastructural and histochemical investigations of 605
Intercellular junctions, gap, immunolocation of in *Drosophila* 835
— —, tight, vascular endothelial 803
Intermediate filaments, of shark leucocytes during chemotactic migration 47
Interphase, cell retraction 321
Intracisternal granule, formation, during the estrus cycle of the rat 11
Intracuticle, the tardigrade cuticle. II. Evidence for a dehydration-dependent permeability barrier in the 263

J

J1/tenascin, mammalian adhesion molecule, antibodies to label the receptor lymph cavities of insect sensilla 639
Junctions, gap, immunolocation of in *Drosophila* 835
—, intercellular: dye and electrical coupling of endothelial cells, *in situ* 797
—, —, in honeybee adult dorsal ocelli 199
—, —, tight, vascular endothelial 803
—, tight, actin localization at, in invertebrate ciliated epithelia 37
—, —, in endothelial cells 161

K

Kidney cells, opossum, growth and differentiation of, on microscopically transparent microporous membranes 355
Kleptocnidism, in narcomedusae and a medusivorous ctenophore 723

L

Lactation, in rat, ultrastructure of pituitary folliculostellate cells during treatment with 2-bromo-α-ergocryptine 841
Lamellae, annulate: an organelle in search of a function 343
Lanthanum, exogenous tracer, the penetration of, through the enameloid organ of developing teleost fish teeth 419
Lipid, -wax secretion and ultrastructural development in the egg-waxing (Gené's) organ in ixodid ticks 113
—s, in tardigrade cuticle 263
Lipopolysaccharides, and phorbol esters, effects of on endothelial cell microfilaments 813
Lymphoid sheath, periarterial, postnatal development of the splenic white pulp in the golden hamster *Mesocricetus auratus* 403

M

Macrophages, and epithelial cells, of the thymus gland 69
Malpighian tubules, of *Aeshna cyanea* larvae, peroxisomes of 917
Mechanical stress, effect of on cellular morphology 747
Mechanoreceptors, in cercal sensilla of blowfly 281
Medusae, narco-, novel cnidocysts of 723
Membrane, plasma, reticular systems of, in the oenocytes of an insect 463
—s, microporous, growth and differentiation of opossum kidney cells on microscopically transparent 355
Membranous tubes, in pseudoscorpion spermiogenesis 153
Mesenchyme, exogenous glycosaminoglycans modulate

chondrogenesis, cyclic AMP level and cell growth in limb bud- 673
Metamorphosis, the development of epidermal feet in preparation for, in an insect 891
Microfilaments, endothelial cell, effects of phorbol esters on 813
Microporous membranes, growth and differentiation of opossum kidney cells on 361
Microprobe analysis, of calcium-induced differentiation of the white mutant (LU887 × LU897) strain of *Physarum polycephalum* 495
Microtubular arrays, development of, in the germ tissue of an insect 123
Microtubules, a single layer of is part of a complex cytoskeleton in mature nematocysts of *Hydra* 179
—, in Sertoli cells 361
—, organelle transport, and steroidogenesis in cultured adrenocortical tumor cells, 1. An ultrastructural analysis of cells in which basal and ACTH-induced steroidogenesis was inhibited by taxol 479
Microvilli, dynamic role of, in peritrophic membrane formation 627
—, effect of mechanical stress on 747
Midgut, caecae, of mosquito larvae, I. Fine structure 243
—, —, of mosquito larvae, II. Functional aspects 253
— cell, insect, the intracellular pathway and kinetics of digestive enzyme secretion in an 101
— epithelium, of *Aeshna cyanea* larvae, peroxisomes of 917
— microvilli, dynamic role of, in peritrophic membrane formation 627
Migration, of cells from the sponge *Geodia cydonium* 25
Millipedes, deposition of calcium salts in oocytes and ovarian somatic tissue of 443
Mitochondria, in midgut caecae of mosquito larvae 243, 253
Mitosis, in cell cultures of the adult newt cardiac myocyte 335
Mollusc, *Helix aspersa*, cytochemical localization of calcium in renal sac nephrocytes of 753
Monoclonal antibodies, to connectin in nematode muscle cells 517
— antibody, to basal lamina 559
Morphometry, of muscle type in tadpole tails of *Xenopus laevis* and *Rana temporaria* 773
—, of triad foot processes, in two types of fiber from hind limb muscles of the rat 783
—, quantitative, of effects of phorbol esters on endothelial cell microfilaments 813
Moult, embryonic, in *Orchestia cavimana* (Crustacea: Amphipoda) 431
Mucous cells, tracheal gland, stimulated *in vitro* with adrenergic and cholinergic drugs 59
— cells, and ciliated cells, development of, from basal cells in hamster tracheal cell cultures 195
Muscarinic receptors, influence of differentiation on, in NIE 115 neuroblastoma cells 825
Muscle, cardiac myocyte, analysis of DNA synthesis in 335
—, flight, of *Pieris brassicae*, mode of formation of 875
—, mouse diaphragm, effects of anoxia on cellular damage in the incubated 857
—, quantitation of 'junctional feet' content in two types of muscle fiber from hind limb muscles of the rat 783
—, sarcolemma blebs and cell damage in mammalian skeletal 211
—, type, a comparison of the distribution of, in tadpole tails of *Xenopus laevis* and *Rana temporaria*: an histological and ultrastructural study 773
— cells, of *Caenorhabditis* (Nematoda), anti-connectin monoclonal antibodies that react with the unc-22 gene product bind dense bodies of 517
Muscular systems, in the barnacle *Tetraclita squamosa japonica*, ultrastructural investigation on 863
Myoblasts, of flight muscles of the butterfly *Pieris brassicae* 875
Myocyte, newt cardiac, analysis of DNA synthesis in cell cultures of the adult 335
Myogenesis, of flight muscles of the butterfly *Pieris brassicae* 875

N

Nematocyst, discharge, in anemone tentacles 17
—s, mature, of *Hydra*, a single layer of microtubules is part of a complex cytoskeleton in 179
Nematode, *Caenorhabditis*, anti-connectin monoclonal antibodies that react with the unc-22 gene product bind dense bodies of muscle cells of 517
—, monhysterid, a putative new hydrostatic skeletal function for the epidermis in 525
Nephrocytes, renal sac, of *Helix aspersa*, cytochemical localization of calcium in 753
Nervous system, cerebral, of moth larva *Heliothis zea*, FMRF-amide immunoreactivity of 569
— —, fine structure of the pheromone-sensitive sensilla on the antenna of the hawkmoth, *Manduca sexta* 139
— —, glial culture, activation, substrate effects and proliferation 759
— —, insect sensilla, antibodies to the mammalian adhesion molecule J1/tenascin and its carbohydrate epitope L2/HNK-1 label the receptor lymph cavities of 639
— —, mesothoracic ganglion of *Locusta migratoria*, immunolocalization of glutamate decarboxylase in 581
Neuroblastoma cells, NIE 115, influence of differentiation on muscarinic receptors in 825
Neuropeptide, FMRF, -immunoreactivity in cerebral nervous system of a moth larva *Heliothis zea* 569
Nuclear envelope 535
Nucleolus, elimination of, from the nucleus of a living cell by centrifugation (a literature review) 535
Nucleus, elimination of nucleolus from, by centrifugation (a literature review) 535
Nurse cells, of *Hydra carnea*, differentiation of 381

O

Ocelli, adult dorsal, of honeybee, intercellular junctions and rhombic particle arrays in the developing 199
Oenocytes, of an insect, the formation of plasma membrane reticular systems in 463
Onychophora, *Peripatus*, ultrastructural and histochemical investigations of integument of 605
Oocytes, and ovarian somatic tissue of millipedes, deposition of calcium salts in 443
Oogenesis, and nurse cell differentiation, a new model of, based on light and electron microscopic analysis 381
Organelle transport, in cultured adrenocortical tumor cells 479, 687
Osmoregulation, in gill epithelium of green crab 299
—, in mosquito larvae midgut caecae 253
Osteoclasts, demonstration of bone resorbing cells in elasmobranchs: comparison with 925
Ovary, of *Penaeus semisulcatus*, protein synthesis *in vitro* in cultures of 911
—, telotrophic, of an insect, the development of microtubular arrays in the germ tissue of 123

P

Pancreas, of the adult newt, *Notophthalmus viridescens*, localization of insulin, glucagon and somatostatin in 1
Particle arrays, rhombic, in the developing and adult dorsal ocelli of the honeybee 199
Pentastomid, arthropod parasite, developing in its rodent intermediate host, further evidence for the protective role of sub-parietal cell membranous secretory product on the cuticle of 699
Periarterial lymphoid sheath, postnatal development of the splenic white pulp in the golden hamster *Mesocricetus auratus* 403
Peripatus, integument, ultrastructural and histochemical investigations of 605
Peritrophic membrane, formation, dynamic role of microvilli in 627
Permeability barrier, to water deprivation and replenishment: adaptive response of, in avian epidermal differentiation 83
Peroxisomes, of *Drosophila melanogaster*, cytochemical localization of a D-amino acid oxidizing enzyme in 661
—, of the midgut epithelium, Malpighian tubules and fat body of *Aeshna cyanea* larvae 917
Pheromone, -sensitive sensilla, on the antenna of the hawkmoth *Manduca sexta*, fine structure of 139
Phorbol ester, TPA, dramatically inhibits planarian regeneration 395
— —s, effects of on endothelial cell microfilaments: laser scanning confocal microscopy and quantitative morphometry of dose dependent changes 813
Physarum polycephalum, calcium-induced differentiation of the white mutant (LU887 × LU897) strain of 495
Pituitary, anterior, of the rat, granulated marginal cell layer of 849
—, folliculo-stellate cells of lactating rat, during treatment with 2-bromo-α-ergocryptine, ultrastructure of 841
—, intracisternal granule formation during the estrus cycle of the rat 11
Planarian regeneration, the phorbol ester TPA dramatically inhibits 395
Plasma membrane, reticular systems, formation of, in the oenocytes of an insect 463
Platyhelminth, *Dugesia lugubris* 507
—, planarian, the phorbol ester TPA dramatically inhibits regeneration of 395
Portasomes, in midgut caecae of mosquito larvae 243, 253
Potentiation, EGF, induced interphase cell retraction: its reversal and 321
Protein synthesis, *in vitro* in cultures of the subepidermal adipose tissue and the ovary of the shrimp *Penaeus semisulcatus* 911
Protozoa, karyorelictean ciliate *Trachelorapbis*, ultrastructure of feeding in the 189
Pseudoscorpion, spermiogenesis, membranous tubes in 153

R

Receptor lymph, cavities, of insect sensilla, antibodies to the mammalian adhesion molecule J1/tenascin and its carbohydrate epitope L2/HNK-1 label the 639
Receptor-effector complexes, cnidocytes and adjacent supporting cells form, in anemone tentacles 17
Receptors, muscarinic, influence of differentiation on, in NIE 115 neuroblastoma cells 825
Regeneration, and formation of scales, in the teleost fish *Hemichromis bimaculatus* 447
—, planarian, the phorbol ester TPA dramatically inhibits 395
Renal sac, nephrocytes, of *Helix aspersa*, cytochemical localization of calcium in 753
Reproductive system, annulate lamellae in germ cells 343
— —, cytoskeletal involvement in spermiation and sperm transport 361
— —, deposition of calcium salts in oocytes and ovarian somatic tissue of millipedes 443
— —, membranous tubes in pseudoscorpion spermiogenesis 153
— —, morphogenesis of silkmoth chorion: sequential modification of an early helicoidal framework through expansion and densification 227
— —, oogenesis in *Hydra carnea*: a new model based on light and electron microscopic analyses of oocyte and nurse cell differentiation 381
— —, ovary of *Penaeus semisulcatus*, protein synthesis *in vitro* in 911
— —, the development of microtubular arrays in the germ tissue of an insect telotrophic ovary 123

Reticular systems, plasma membrane, the formation of in an insect 463

S

Sarcolemma blebs, and cell damage in mammalian skeletal muscle 211
Scale formation, and regeneration, in the teleost fish *Hemichromis*, the same cell lineage is involved in 447
Scales, fish, accumulation of zinc by 935
Secretion, and synthesis, of vitellogenin, in fat body of the stick insect 543
—, digestive enzyme, intracellular pathway and kinetics of, in an insect midgut cell 101
—, of peritrophic membrane 627
Secretory product, subparietal cell membraneous, further evidence for the protective role of, on the cuticle of a pentastomid arthropod parasite 699
Sensilla, cercal, of the blowfly Lucilia cuprina, II. Structure of the enveloping cells and the basal regions of the sensory dendrites 281
—, insect, receptor lymph cavities of, labelled by antibodies to the mammalian adhesion molecule J1/tenascin and its carbohydrate epitope L2/HNK-1 639
—, pheromone-sensitive, on the antenna of the hawkmoth *Manduca sexta*, fine structure of 139
Sensory dendrites, in blowfly cercal sensilla 281
Serotonin, endothelial cell junctional integrity modulated by, an ultrastructural analysis 161
Sertoli cell, cytoskeleton of 361
Shark, fine structure of leucocytes of, during chemotactic migration 47
Skeleton, hydrostatic, in monhysterids (Nematoda), a putative new model for 525
Skin, of *Rana pipiens*, histological changes in, produced by metabolic alkalosis 219
Somatostatin, insulin and glucagon, localization of in the pancreas of the adult newt, *Notophthalmus viridescens* 1
Sperm transport, cytoskeletal involvement in spermiation and 361
Spermiation, cytoskeletal involvement in 361
Spermiogenesis, pseudoscorpion, membranous tubes in 153
Spiracular closing, mechanism in the firebrat *Thermobia domestica* (Thysanura) 93
Spleen, postnatal development of, in the golden hamster 403
Sponge, *Geodia cydonium*, directed migration of cells from 25
Steroidogenesis, in cultured adrenocortical tumor cells 479
Subparietal cell, membranous secretory product of, protective role on the cuticle of a pentastomid arthropod parasite 699

T

Tardigrade, cuticle of, II. Evidence for a dehydration-dependent permeability barrier in the intracuticle 263
Taxol, inhibition of basal and ACTH-induced steroidogenesis by 479
—, -induced changes in cell ultrastructure: reversibility of inhibition is not accompanied by reversibility in taxol-induced changes in cell ultrastructure 687
Teeth, developing teleost fish, the penetration of exogenous tracers through the enameloid organ of 419
Teleost fish, *Hemichromis bimaculatus*, the same cell lineage is involved in scale formation and regeneration in the 447
— —, the penetration of exogenous tracers through the enameloid organ of developing teeth of 419
Thymus gland, macrophages and epithelial cells of: an ultrastructural study in the natterjack toad, *Bufo calamita* 69
Thrombin 171
Ticks, ixodid, wax lipid secretion and ultrastructural development in the egg-waxing (Gené's) organ in 113
Tight junctions, endothelial, vascular, structural alterations in, in the course of their gradual degradation *in vivo* 803
— —, of invertebrate ciliated epithelia, actin localization at 37
— —, in honeybee dorsal ocelli 199
Tissue culture, analysis of DNA synthesis in cell cultures of the adult newt cardiac myocyte 335
— —, dual-phase response of bovine pulmonary artery endothelial cells to agonists which increase free cytoplasmic calcium concentration 171
— —, endothelial cell junctional integrity modulation by serotonin: an ultrastructural analysis 161
— —, fibronectin network recovery in confluent PtK2 cells after acrylamide treatment 647
— —, induced interphase cell retraction: its reversal and EGF potentiation 321
— —, influence of differentiation on muscarinic receptors in N1E 115 neuroblastoma cells 825
— —, -media conditioned by wounded cells modify the fibronectin localization pattern of unwounded confluent PtK2 cells 653
— —, microtubules, organelle transport, and steroidogenesis in cultured adrenocortical tumor cells, 1. An ultrastructural analysis of cells in which basal and ACTH-induced steroidogenesis was inhibited by taxol 479
— —, microtubules, organelle transport, and steroidogenesis in cultured adrenocortical tumor cells, 2. Reversibility of taxol's inhibition of basal and ACTH-induced steroidogenesis is unaccompanied by reversibility of taxol-induced changes in cell ultrastructure 687
— —, protein synthesis *in vitro* in cultures of the subepidermal adipose tissue and the ovary of the shrimp *Penaeus semisulcatus* 911
— —, the development of ciliated and mucus cells from

basal cells in hamster tracheal epithelial cell cultures 195
Tracers, exogenous, the penetration of, through the enameloid organ of developing teleost fish teeth 419
Tracheal epithelium, cell cultures, the development of ciliated and mucus cells from basal cells in hamster 195
— gland, mucous cells stimulated *in vitro* with adrenergic and cholinergic drugs 59
Tracheloraphis, karyorelictean ciliate, feeding in 189
Triad, quantitation of 'junctional feet' of, in two types of muscle fiber from the hind limb muscles of the rat 783

V

Vitellogenin, synthesis and secretion in the fat body of the stick insect *Bacillus rossius* 543
—, the secretory pathway of, in the fat body of the stick insect *Bacillus rossius*: an ultrastructural and immunocytochemical study 589

W

Water, deprivation and replenishment: adaptive response of permeability barrier to, in avian epidermal differentiation 83
— balance, and spiracular closing mechanism in the firebrat 93
Wax, -lipid secretion and ultrastructural development in the egg-waxing (Gené's) organ in ixodid ticks 113
Wings, developing, of *Manduca sexta*, hemocytes contribute to both the formation and breakdown of 559

Y

Yolk, vitellogenin synthesis and secretion, in fat body 543, 589

Z

Zinc, ultrastructural and histochemical aspects of accumulation of, by fish scales 935
